PETITION - ***Monroe County Educators Association***

Our Schools; Our Voices – Include Teachers in Decisions!

Our teachers and staff deserve voice, equity and transparency in all matters impacting their careers, their working conditions and student learning conditions. District leaders have concluded that the district faces significant financial pressures in the years to come. Those pressures raise the likelihood of impactful changes in teaching assignments and working conditions for district teachers.

We call on MCCSC to honor our board-adopted discussion policy and collaborate with MCEA, as the exclusive representative, to develop and adopt a mutually agreeable policy concerning teaching assignment changes and other effects of staffing level changes. Such a policy must meet the needs of our students and schools and honor our teachers' expertise and work experience and be enshrined in MCCSC board policy.
