Detail Justification that Validates Special Purchasing Method. Please attach any supporting documents.

This remote camera system allows us to look for and locate suspect vehicles involved in criminal activities. It helps locate stolen vehicles through identification technology. These cameras are already in use around the state and by entering into a contract with them, we will have nationwide and statewide access to the database of cameras internally. Currently we have to ask other agencies to look at their cameras.

Describe the product or service the vendor will provide and explain why this meets the special purchasing method checked above.

10 cameras placed through out the city by the vendor and a one year service contract for digital storage and software support. The placement would be in coordination with Monroe County and IU.

Detail the research performed to determine this purchase method is the best solution for the city. We have seen the success IU and Monroe County has had with this system. Also this is the most common system used throughout the country.

Describe why this vendor and solution was chosen.

This system allows integration and cooperation with IU and Monroe County who already have the system in areas outside the city. This would allow for a more cohesive response to rapidly evolving events. This system has a proven track record of success with our partner agencies already.
